FTC SAFETY SOLUTIONS

ILLUMINATED VEHICLE LIVERY

Equipment Visual Warning Safety Device

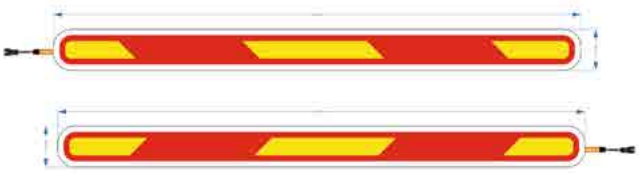
INCREASE EQUIPMENT VISIBILITY

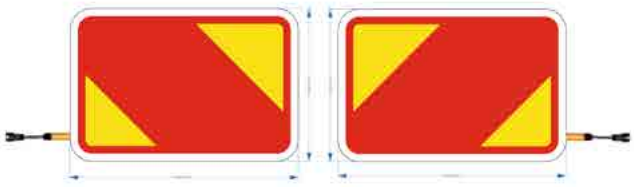
MULTIPLE SOLUTIONS

What is IVL?

FTC's Illuminated Vehicle Livery is an electronic lighting solution that greatly enhances visibility of potentially dangerous equipment and machinery.

Offering the reflective qualities of hi-visibility panels with the ability to animate, illuminate, flash or pulse sections of the panel (using light for added visual awareness).





How does it work?

Generally fitted to the rear but there are no limitations to mounting locations. FTC can offer a number of options as to how the wrap illuminates from switching on with the ignition, an auxiliary on/off switch or a day/night sensor option.

Key Features

- Visual alternative to audible devices
- Cost-effective safety solution
- Clean & straightforward installation
- Integrates with other FTC systems
- Robust & durable
- Adjustable brightness & flash patterns
- CE Certified
- Multi-voltage
- Various options (IGN On, day/night sensor)

Other Applications

Can be used in applications other than vehicle illumination.

- Fixed infrastructure & signs
- Materials handling equipment
- Road going vehicles
- Plant equipment

Sizes available: (sold in pairs)

Strips:

- 300mm X 70mm
- 450mm X 60mm
- 600mm X 70mm
- 700mm X 70mm
- 900mm X 70mm
- 1000mm X 70mm

Squares/rectangles:

- 150mm X 300mm
- 200mm X 200mm
- 200mm X 300mm
- 280mm X 75mm
- 300mm X 95mm
- 500mm X 500mm (single only)
