DRIVER AID CAMERA SYSTEMS

Help to increase site safety & manoeuvre plant equipment safely

OPERATE EQUIPMENT SAFELY

MORE VIEWS TO ASSIST WHEN LOADING

MULTIPLE OPTIONS AVAILABLE

What are Driver Aid Camera Systems?

The systems offer enhanced visibility to the operator from a standard driving position.

The cameras can be located on the vehicle in various locations and focus on the area of sight required. The pictures are sent to a colour monitor located within the cab, acting as an aid to assist the driver to make adjustments to lifting or moving.

Standard Wireless Camera

Allows for up to 2 cameras to be installed anywhere on MHE or plant equipment where the driver's vision is obscured in order to aid their view.

- Can be fitted to any equipment
- Wired and battery powered wireless cameras available
- Easy to view 7 inch LCD screen
- Robust and hard-wearing design
- Easy to install
- Camera view can be tied into reverse or other function

Fork Mounted Wireless Camera

Provides a clear view of the forks offering greater precision in fork alignment when loading/unloading, this is especially useful when loading at height.

- Can be fitted to any forklift
- Lithium Ion battery powered camera
- Easy to view 7 inch LCD screen
- Robust and hard-wearing design, easy to install
- Option to add additional standard wireless camera
- Camera view can be tied into reverse or other function

Digital Wireless Fork Camera with Laser

A 2.4GHz digital wireless 1080P HD camera with a laser projects a guide line for accurate positioning. These high-definition systems provide a reliable, cable-free feed to operators in manufacturing, warehousing and agriculture.

- High-Definition Video
- Laser Guide
- Digital Wireless Signal
- Industrial Durability Infrared Night Vision

Wireless Reversing Camera

Allows multiple cameras to be installed anywhere on MHE or plant equipment where the driver's vision is obscured to aid their view.

- Can be fitted to any equipment
- Easy to view 7-inch LCD screen
- Robust and hard-wearing design
- Easy to install
- Camera view can be tied into reverse or other function

Key Features

- Help to avoid collisions and unnecessary damage
- Increased driver efficiency
- Improved driver ergonomics
- Manoeuvre safely in confined areas
- Wireless and wired cameras
- Can be fitted to any forklift
- Easy to install
- Multiple options available

Power Options

Each system is flexible with either a hard wired solution or battery powered. Installation locations are numerous to suit your materials handling equipment.

Additional Cameras

The camera system can accommodate up to four cameras, recording all four views simultaneously, with the option of displaying all four views via the optional in cab mounted display.
